Civilian jurisprudential derivatives and Military life expectancy yields shall perpetuate this gift of life to establish future value virtually with the system multiple scalability equation and the causal-mechanical edifice with equation.

### System Multiple Scalability Equation

- $\{S_N = (S_E/T_M)(M)\}$ ;  $T_M = (X \text{ Produced})/(X \text{ Production Cost at } \underline{\text{Multiple}})$ 
  - $S_N = \text{System Scale to Necessity}$
  - $S_E = \text{Cost of Achievement of Example System including Resources}$
  - $T_M = X \text{ or } \$ \text{ Produced} / X \text{ or } \$ \text{ to Startup}$
  - $M = \underline{\text{Multiple}}$  of Systems Proposed

### Causal-Mechanical Edifice

Cause and result have a direct relationship where the cause is always positioned before the result, and the result is always equal to and proportional to the cause—in the normal flow of time to normal chronological events.

Special flow of time may include non-chronology in that a cause which is at a circumstantial position after the result may yet then reposition the result in the normal flow of time to chronological events. Identification of the critical difference within the flow of time separating a unified singular cause different yet equal from a unified singular result is necessary through the empty dimensionless latticework separating material.

The causal-mechanical equation allows Open Source Citizen Control of The United States of America's Principal Officer to create an increase of the fixed positive signature for the asymmetric flow within time from how a cause and result are inertially positioned. This is how an inertial impact identity retains the protections to and from the plural possessive value of State and County Constitutions proving universal directivity or pattern.

The OSCC USA Causal-Mechanical Edifice — 3 Axioms and Equation:

**First Axiom:**

Time possesses a quality, creating a difference in causes from results. This is detectable with directivity or pattern. This property determines the difference of the present from future difference; and/or the difference in the past from the future. Proceeding from those circumstances in which: 1) cause shall be exalted for the realized result and may be outside of the body in which the result is realized and 2) the result sets in after the cause.

**Second Axiom:**

Causes and results are always separated by space. Therefore, between them exists an arbitrarily small, but not equaling zero, spatial difference.

**Third Axiom:**

Causes and results are separated in time. Therefore, between their appearance there exists an arbitrarily small, but not equaling zero time difference of a fixed sign.

Causal-Mechanical Edifice Equation:

$$\mathbf{S} = (\mathbf{i}C_2 + \mathbf{j}u) \left| \frac{\hat{c}p_2}{\hat{c}x} \right| \quad \mathbf{R} = -(\mathbf{i}C_2 + \mathbf{j}u) \left| \frac{\hat{c}p_2}{\hat{c}x} \right|$$
